

IRC Agrochemicals Private Limited. Haldia Plant

Environment Policy

IRC Agrochemicals, part of Indorama Corporation, is committed to protect the environment by setting goals aligned to the group Environment Protection Policy which involve:

- Minimize the environmental impact of our facilities, especially by reducing the consumption of natural resources and the generation of waste & emissions related to company activities & by implementing Best Available Techniques (BAT).
- Involve our employees, suppliers & customers in our continuous improvement processes to better satisfy the stakeholders expectations.
- Offer the product and services that respect the environment
- Reduce the environmental impact/ pollution by our products and services by reducing, reusing, recycling methods as a part of life cycle management.

Aligned to the principles of responsible care IRC Agrochemicals is committed to:

- Meeting current environmental requirements to fulfil compliance obligations and exceeding them when relevant.
- Design processes and Formulate products that respect the environment .
- Offer its consumers/ customers products & services that are safe & environment friendly.
- Linking innovation and continuous improvement to meet new environmental challenges.
- Promoting environmental awareness and developing best practices.
- Continually Improve its environmental performance to meet the expectation of the stakeholders.
- Reporting to all stakeholders about the impact of the company's activities on the environment. Regularly monitor , review environmental performance and set objectives and targets for improvement as part of the performance management system.
